

eSpace INCUBATOR RESULTS SINCE INCEPTION

Number of applicants	87
Number of companies incubated	13
Number of companies graduated	2
Number of graduate companies ongoing	2
Number of women-owned companies	2
Number of companies based on CU student/faculty research	5
SBIRs submitted	16
SBIRs won	8
Revenue generated (SBIRs and industrial contracts)	\$1,420,000
Revenue generated for companies to dollar spent	\$2.72 to \$1.00
ROI since inception in 2009	172%

eSpace STRAIGHT TO SPACE PROGRAM SINCE INCEPTION

Number of individuals supported in training	74
Number of companies supported	23
Annual salaries created by eSpace support	\$3,328,000
Salaries generated to dollar spent	\$13.93 to \$1.00
ROI since inception in 2009	1,293%

eSpace VENTURE DESIGN PROGRAM SINCE INCEPTION

Number of undergraduate & graduate projects supported	8
Number of companies formed from projects	3
Number of additional commercialization events	2

WHO ARE WE?

eSpace: The Center for Space Entrepreneurship was established in 2009 as a 501(c)(3) non-profit organization formed from a partnership between Sierra Nevada Space Systems and the University of Colorado. Our mission is to help develop and catalyze entrepreneurial space companies, to commercialize the technologies these companies create, and to develop a passionate 21st Century workforce that will fuel their growth as well as the growth of the aerospace industry as a whole.

WHAT DO WE DO?

We accomplish our mission through three programs:

- (1) The eSpace Incubator, in which we provide a suite of traditional resources as well as aerospace-specific resources that optimize our companies' chances for success,
- (2) The Straight to Space program, in which we provide training grants to entrepreneurial aerospace companies hiring new technicians or engineers, and
- (3) The Venture Design program with the University of Colorado, in which we financially and academically support undergraduate and graduate hands-on design projects that may have enough commercial potential to transition into the eSpace Incubator.
